

24V Tactical Power Distribution Panel (Vehicle Service Panel)

Centralized Power Distribution &
Circuit Protection for Mission-Critical
Vehicle Systems

PD24V-SRC

The PD24V-SRC is a rugged 24VDC power distribution panel designed for tactical and specialty vehicles. It delivers reliable, organized power to multiple onboard systems through a high-current busbar architecture with integrated circuit protection and MIL-grade connectivity.

KEY FEATURES

- 24VDC multi-channel power distribution system
- 6 auxiliary outputs for subsystem integration
- 3 service sockets (12V / 24V configurable)
- Integrated thermal circuit breakers (15A / 30A)
- High-current busbar distribution architecture
- Parallel power routing for stable load delivery
- Centralized grounding system for reliability
- MIL-DTL-5015 circular connectors
- Sealed connectors with protective caps
- Rugged panel-mounted design for vehicle integration
- Resistant to vibration, dust, and moisture

APPLICATIONS

- Military ground vehicles
- Tactical and armored platforms
- Law enforcement vehicles
- Emergency and utility vehicles
- Off-road and heavy-duty equipment
- Mobile command and control systems
- Industrial vehicle platforms
- Custom vehicle electrical integration
